ETIKPE – PREFACE

Mini yemapakondorogi Enyabagi Nupe o, Enyaba ko Enyalo dan mini nyana zo gan na, tuko bana Nupencizhi e bici u na, nama wanfe Patampa enya na ezazhi a tagbogun eti kpinkpin u bo na. Dagan cyaba enyadondo, ezandondo yi egi mimaci ezhimi be dandan nya ezhimi wuncin, nama yi kpeye bya le mini yi ye fi tatacin ezhimi epadzuru zhi o na, wuncin ma gonyi u fe enya na a la yi kegan be dzodzo yi nyi na. Zumazheta ga yi gwako enya na e wu ezhimisun zhi kakanyi kin Nigeria o na o. Nama Nupe dan mini ezhimi nazhi ezazhi e duwan kede wun dan mini ezhimi na Hausa ko Nasara goti be nyi na, ke nya yitso lugwa. Lugwa mi la erin be: Egi mimaci Nupe eye-to-zuma ma enyaba be Nupe nya, sayi wun ga u lakeba be Nasara e ko kenci kanga ga enya a ye ba o. Egan nana a fe egan yekpa ya mi. Enyabagi ga yi eyekosun yizhe le yi nya o ebo wunga aga ji wo e ye vanyi o. A de kpangwa yizhe na ga ye dantsunwan wunma yi be enyaluloci nya na. Byacin, Enyabagi Nupe na yi a kpin na, wan zhe kpaka tati yi bo. Nupencizhi, eka kawanyi na yi de yi ci ga la enyana ya yi na zhin eko na, ga danna o, yi ga tagbogun eti egwalasun Nupe o, Soko a ye ma, nya zandoci zhi tsa yi a fe gbe za o, ke nyaba yitso lugwa o, kede wun a gbagba na wan keden ci u le etswa ye na.

Byacin, enya wangi ndondo na wo ga e tuye na, be na woga jinwo na e eti eyelo ezhimisun yi bo na, bandondo wunga gbota da kan na, gbanyadzu dan u kami yi maka e danbo na. Gbangban nya eza nana wunga yi; dada wan nya o dan, ebo nya yi ga yi nya yi nya o, nyaba ma yi nyaba a.

ENGLISH TRANSLATION

In the Philosophy of Nupe Mathematics, Counting (Enyaba or Enyalo) is one of the most difficult aspects that Nupe people shy away from learning due also to the situation our society is in which makes Nupe people and others lazy about seeing the strength of Numeracy in their Primary Languages.

In the first place, you are a child of a tribe and culture, now that you know your secondary language (English) and soil (Nigeria), is not a reason to neglect your origin. Negligence is what's killing many Languages in Nigeria. In the case of Nupe, we are in an awful fix because we are content with the influence of our society. Take for example: a bonafide Nupe Son can no longer count in Nupe unless he/she mixes it with English or Hausa before he is able to communicate, which is very appalling.

Mathematics is a fundamental eyeball of all aspects of life because of it's simple relevance. No section of life can be measured without calculation; as such the need to learn Nupe Mathematics is paramount.

Nupencizhi, this is the only time we have to restore our long time plans, if we are careless in handling it, God forbid, we may continue to borrow from those who are faraway and will never consider your Nupe as important enough to see the moon.

So whatever good you are expected and can do to help this plan no matter your level, please it is never late. Do it now and let ours be ours and theirs be theirs. Thanks!

Adamu Idris Manarakis niw

DZUNDZUN – INTRODUCTION

Mini ezaba nya etun kpata na Nupencizhi e lo na o, kpataki eza makamagi bagi ko nyizagi na dan eban ninbo ko eban zuma o na, wo a leye gangan aga jin ah tagbogun be enyaba e na ga a gbintu shitsun na, beto eda kpautsun zhi. Nana ma wugwa gan yekpa Nupencizhi gona-go kagan ah de kpikpe eti dangugizhi bwa na, kpataki nya Nasara ko Arabi. Yetso wo gan enunuci na ga e wa lo dana lilici na, ko wun e wagan wun shi pupugi na, aga u jin egun ebo enya na wun ma ba na. Gbani, yi degwa na yiga wa eyelo ya eza yi zhi na.

Dakagi nana yi eti eyelo waya kinmi yi bo o, nama Kpikpewaba Patampa nazhi fi Kin Nupe o na, a fe wu enyaba na.

Mi e wa be Nupenci ndondo e kede wun la nini u shi na, wun ma u kpin emilatu zhi nya Dangugi Nupe nana.

Dakagi nana gangan zhi etigan caba nya Enyaba o; Enya lakeba, Enya like, Enya gan, be Eda e.

Beacin, dakagi nana de edushi eti kendo Nupencizhi fe ba enya warawara panyi le na a. A tswa enya woro danguruko zhi fi mini dakagi nana o, nama a be de etun wangi zhi yegboro, fondoci na.

TRANSLATION

In interacting with Nupes of all works of life especially the ordinary man or woman in rural nupe land you will find they can hardly count beyond 100 and multiples of 1000 in Nupe. Thus this limits their potential to think as Millionaires or Billionaires if they have no knowledge of other numeracy system especially the western or Arabic. You have all heard anecdotes on how farmers going for Hajj or trying to buy a motorcycle have been cheated due to their inability to count. We now have an opportunity to empower our people.

This book is an empowerment tool and should be available at all primary schools in Nupe speaking states.

I urge every Nupe person to pick up a copy and understand the basic rules of Nupe numeracy.

The book focuses on basic counting, addition, subtraction, multiplication and division.

The book however does not delve into the ancient numerical system of the Nupe's. This art form though almost extinct is talk for another Day.

Dr (Mrs) Aishetu Ndayako-Mohammed.

EGANKO – COMMENT

Nini mini mimancinle nazhi kin babo gonyi u gunkun eti u bo na, wun yi lilanyi na ezhimisun nya kin-denzhi la ezhi mi nya kin babo ndoci zhi danmi eti rurukpe o na.

Kendo na yi e dinnyi dan ezhimisun kin-den zhi ke nya yitso lugwa na, wunga la ezhimisun yi zhi ci de yegborolo kendo gonyi na nyi o.

Beacin, eyelo na Adamu Idris Manarakis e wa ya ezhimisun Nupe na, wun ge Gawama jin ya. Enya nazhi wun e jin gbani ebo eyelo kinnupe o na, wunga kuci yi zhi layedan kendo gonyi na a nyi o, nama kagan yi kukuta, wan la zumazhin be ya yi na. Eza nyiri nana zhi gonyi a de egwaso. Eyelo wa ya ezhi mi yi zhi, wun yi etun zandondo.

Bokunshicizhi be eza nazhi de ewo fi Kinnupe o na, wun gonyi ala egwafin gbannyi dan nyadzugba nana o eti ewuce o ebo wun la u fe egun-lashishi ya egi nazhi la be yizhe a na.

TRANSLATION

One of the problems Nigeria would have to fight squarely, and which she has not handled with seriousness, as a developing nation is language imperialism. Over emphasis in the understanding of foreign languages while neglecting our Local languages is a ban to national development. Therefore, Adamu Idris Manarakis' relentless effort in seeing to the growth of Nupe Language deserves commendation. His type of passion for the preservation of his mother tongue is what our societies have lacked for a long time, which has contributed to our backwardness to some extent. These kinds of people are not supposed to be left to their own efforts. Indigenous language promotion should be everyone's responsibility. Authorities and well to do individuals in Nupe Kingdom ought to key into this project and ensure it is left as a solid legacy for unborn generations.

Abubakar Akote.

(A Minna based Freelance Journalist)

EDZUTACI - EDITOR

Etun boyefa ga Manarakis e lo dan na o. Wun ma e mafi mi be eyelo nazhi wun e de na e. Enya na wo e jin da na, enya ya o na kinnupe gonyi wun gbanyadzu be zumatu i ebo yegborolo ezhimisun yi bo na.

Ejinda gawama na dokun na yegi mi. Mi e kpa wo e be eyelo na gonyi na yegboro.

TRANSILATION

This is an inspirational piece you have here, Manarakis. I am very proud of your achievement so far. This is something the whole Nupe Kingdom ought to be proud of and support with all possible to see that Nupe Language and those who speak it attain a new height.

Congratulations once again brother. I wish you more deserving achievements in the nearest future.

Muhammad Ndaman Jibrin Goro Mokwa

(Man na wu mi Enyabagi nasara na - My Maths Tutorial Master)

Manarakis yi gwazuma mi, a ma u Minna o anma wan zhe enya mamaki ya zandondo bana wunda kpin Nupe na, a ma e wu kpikpewaba yi zhi bwa na.

Nya zana yi nuguciko a na, enya na mi gbanyadzu eti u bo ci e jin na, wunga yi mi tu zuma kendo gonyi na o.

Enyabagi Nupe nana yi bodongi kin Nupe o, nama ala de eza na jin nyiri u le a na, Yi ma e tu enya na gan nana na ye be u nyi yegboro, tona de yi wogan Federal polytechnic Bida ga ca Nupe wu toshi na eti "Ordinary Diploma nya Nupe Language o."

Ejinda na dokun na ya yegi mi.

TRANSLATION

Manarakis is my younger brother, he was born in Minna but it's our surprise in the family on how he came about Nupe Language experience and it's not thought any where, not even our Schools.

As an eldest brother in the family, what I give him always is encouragement because I know he can do better than little I score him.

This Nupe Mathematics (Enyabagi) is a virgin in the history of Nupe Land and it's our hope in the nearest future he will come up with another golden shape, even though we are aware that he recently attains his dream in sending Nupe Language to Federal Polytechnic Bida which will starts next semester as "Ordinary Diploma in Nupe Language."

Once again, Congratulations my brother.

Musa Alhaji Ibrahim

(Mukaddami Samarin Nupe)

TRANSLATION

*Little has been written about Nupe Mathematics "ENYABAGI" and especially little about Nupe **ALJAMI** (Nupe Transliteration) in the late Eighteenth Century of the Common Era. The concept of the knowledge of the Language of Nupe is misunderstood by the observers outside the people of the Language.*

The Nupe scholarship in history have acquired the ideal knowledge and skills that formed what is known as Technology today but absured by the advent of modernity in the societies. This is because the European Colonialists and Religious reformer generally had no taste for the delicately Nupe nuanced acquired knowledge and skills. And certainly not for the intangible progress of the Nupe tribe.

No subject of education that does not touch aspect of Mathematics, be it Geography, physics, Chemistry, Biology, History, and Languages, embedded in Technology. Mathematics as the stem of all subjects of scholarship has much emphacy in all outstanding official languages in the world today; Arabic, French, English, Ibrew, Spanish and etc.

The Author has done a wonderful work in his research of "Nupe Development" to come up with Nupe Numerals which in any official scholarships of the Languages of the world today, is allowed to innovate "Words and Numerals" that are the keys of educational literature today. Modern world is operating on Technology which itself is based on innovations. The efforts put together by the Author is an attempt aiming at bringing out some aspects of the acquired knowledge of the Nupes to enhance its modern development so that it moves along with its contemporary Byzantine tribes of Africa that are scholarly known today: Hausa, Yoruba, Swahili etc of the defunct Khaush Empire of Africa.

"A ga e lo, wo ce lo be a nyi ma."

Alh. Dauda Ibrahim Bida

(Dan Etan Nupe - Nupe Language Historian)

GANMI MANARAKIS MANARAKIS LAW

ADAMU IDRIS MANARAKIS NIW
Director ENLP, Enyabagi Philosopher

GANMI MANARAKIS **MANARAKIS LAW**

GANMI MANARAKIS:- Yi egangan nya Enyabagi Nupe na e lotun be Taki zhi, Egimikagi zhi, abe Egizhi. Kpata a kpetso **p**.

MANARAKIS LAW:- Is a Mathematical Nupe expression that deals with representation of Symbols, Letters, and Numbers. All-over **9**.

Kotsontsoko **Example**

A egi nana zhi lofin dozhi eti Ganmi Manarakis o.

Express these numbers in Manarakis Law.

13 + 12 + 5 - 3

$$\frac{I\text{Ш} + I\text{ц} + \Pi - \text{Ш}}{\rho} = \frac{\text{Ш}\Theta - \text{Ш}}{\rho} = \frac{\text{ц}\Gamma}{\rho} = \text{Ш}$$

19 AUGUST, 2017

EDUKO NUPE LANGUAGE FOUNDATION

Eri - Eexample

$$\frac{I\text{Ш} + I\text{ц} + \Pi - \text{Ш}}{\rho} =$$

$$\frac{\text{Ш}\Theta - \text{Ш}}{\rho} =$$

$$\frac{\text{ц}\Gamma}{\rho} =$$

$$= \text{Ш}$$
